

PRIMARY MASTHEAD

NEWS VAULT

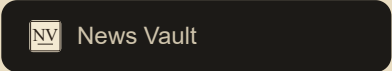

ICON / FAVICON MARK

AT 32×32 (FAVICON SCALE)

ON DARK CHROME TAB

*Wordmark set in Playfair Display (black weight) for the high-contrast, high-thick/thin-stroke feel of classic broadsheet nameplates. Cream newsprint background, deep sepia ink. Rules with corner tick marks echo print masthead borders. Files exported as standalone SVG: news-vault-masthead.svg and news-vault-icon.svg. Note: for production use outside a browser with Google Fonts loaded, convert the text to outlines so the mark renders identically everywhere.*
